

ASA DataFest™ at Mizzou cannot run without your support.

Please see below for Sponsorship opportunities.

Impact of Your Sponsorship

An important feature of ASA DataFest™ at Mizzou is to bring the data science community together. Undergraduate students do the work and they are assisted by consultants who are graduate students, faculty, and industry professionals. Any residual funds will support undergraduate statistics education and foster the new generation of data science.

Benefits of Sponsorship

Sponsors will be provided with various advertising and recruiting opportunities. We would also be happy to provide any further information to the students about your organization as well. Please consider visiting us as a 'VIP Consultant'. We would love to have you stop by as a visitor or a judge for the event. We envision the visitors' role to be either serving as an unbiased judge, or interacting with and mentoring the students, brainstorming with them, and providing statistical, computational, or application specific guidance for a couple hours anytime during the event. It's a wonderful recruiting opportunity and lots of fun, too. This can be quite rewarding to get a chance to chat with the students as they put their creativity and analytical skills to use. Many professionals find ASA DataFest™ to be a great recruiting opportunity—they get to watch talented undergraduate students work under pressure in a team and examine their thinking processes.
